

# SUPER MINI BOOSTER

**NO-TRON**

## *SuperMiniBooster*

**The strongest  
Mini-Booster in  
the World!**

**BAT/42175**

*Dimensions:* 20,4 x 16,2 x 14,5 cm

*Weight:* 4,6kg

### FEATURES

1. The smallest and most light weight Super-Mini-Booster in the World. The product adopts instant strong discharged battery. This new product is only 4.6 kilograms. Only small storage space is needed. Easy for anyone to use.
2. The product can instantly start the engine even with a dead battery without the assistance from another engine. Furthermore, saving your engine will not be limited with the length of cables when the battery of the engine has been exhausted or out of order. The powerful 800 Ampere can directly and instantly start up to 4500 cc 12V Gasoline or Diesel engines. If you connect 2 Super-Mini-Boosters together, it will become powerful 1600 Ampere or which can start 24V Diesel engines.
3. The product ensures the computer system will not be damaged or return the digital records to Zero when restarting the engine. Normally, using one battery to start another battery often causes the computer system to be damaged or return the original records to Zero because of the instant risk and fall of voltage.
4. The automatic control circuit of the product will automatically power-off the fully charged Super-Mini-Booster, which will increase the life span of the product. The product can be charged at any time, and long time charging will not damage the product.
5. The Super-Mini-Booster is equipped with plastic protectors and is short-circuit proof.
6. The product is provided with two powerful LEDs to illuminate the dark.

## USAGE

### a. How to start the engine?

1. Make sure all electrical appliances, such as headlight, radio, air conditioner, etc... is turned off.
2. Connect the red cable clamp with the positive anode and connect the black cable clamp with the negative anode of the battery. Start the engine and then take off the red cable clamp and black cable clamp of the product from the battery.

### b. How to charge the Super-Mini-Booster?

1. You can charge the device with the supplied cable. When the red LED is on, the device has to be charged until the green LED turns on.
2. When the Super-Mini-Booster has been used, you should charge it. We also recommend to charge the device when it has not been used for two months.
3. Each time the product is used, be sure it is recharged to the full capacity. By doing so, it will increase the life span of the product.

## SPECIFICATIONS

Dimensions :	204 mm (L) × 162 mm (D) × 145 mm (H)
Weight :	4,6 kilos
Output :	12V (DC)
Charging power :	AC 100-240V adaptor
Rechargeable battery :	Acid battery DC 12V 17A
Car range :	12V up to 3500 cc Gasoline or Diesel vehicles
Instant max current :	800 Ampere/unit

# Super Minibooster

*The smallest Booster of the world!*

## INTELLIGENT BATTERY CHARGER

Switching Power Charger includes most advanced charging technology and lead this charger into next level.

**BAT/44459**

### FEATURES

- CE version: 220V - 240V
- Automatic charge condition monitoring
- 8 bit LED status indicator & dip switch panel
- Mis-Charge prevention & Battery condition detect
- Battery plate desulfates / re-conditions assist technology
- Over temperature / Over current / Reverse connect protection
