

# STARTER BATTERIES

## EXELLENT RANGE

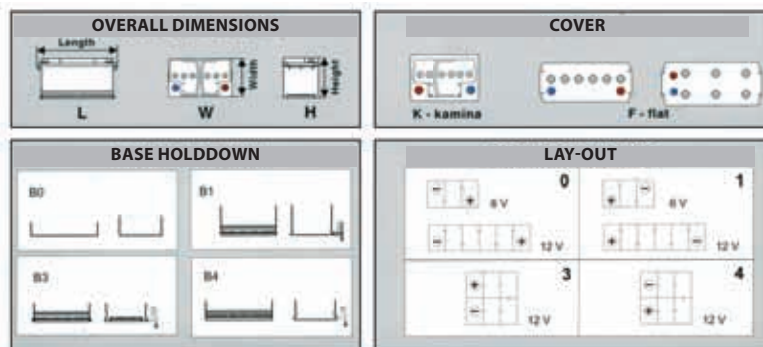

Perfect as a reliable and powerful source of energy!

- Ca/Ca technology
- + 30% of starting capacity!!!
- Minimal water consumption
- Environment-friendly materials
- 100% maintenance-free

## HEAVY-DUTY BATTERIES

These starting batteries are top quality.

- high resistance to vibrations
- additional cell confirmation
- glass fiber separators
- high starting capacity at low temperatures
- low self-discharge

## XTREME STARTING BATTERY WITH AGM - TECHNOLOGY

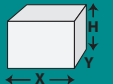

The AGM battery is a starting battery with the characteristics of a semi-traction battery, but with more power.

- Increased efficiency of the active mass, thanks to an increased absorption of the acid.
- Less loss of lead increases the battery life of the battery.
- More starting power, even at low temperatures!
- Longer storage (up to 18 months).
- 100 % maintenance-free.
- Totally leak and gas proof.
